Families need more childcare options! This location is perfectly adequate for a childcare facility. There are many of similar size elsewhere on PCH and other high traffic streets in the South Bay, which operate without issue.	Support	05-16-2024 05:11 pm
The traffic impacts are minimal. A maxed out 98 child facility will have many sets of siblings, who are dropped off and picked up at the same time. These times are spread out over several hours in traditional daycare facilities. I would rarely encounter more than two other families when my children were dropped off and picked up at similar facilities.
