Where is Fire Chief's review/approval of impact of stacked vehicles on 2nd and PCH entry/exits (during dropoff and pickup times) to Emergency vehicles/personnel? Why do all attached documents and Staff Report have different max child numbers: 70...77.....98??? According to Noise Consultant Veneklasen MAX number of children per mitted in playground at one time is 30. How, where and by whom is this condition enforced?  
Where in Mr Raju's Traffic Study has he addressed delays during dropoff related to crying children not wanting to be dropped off?  
Where in Mr Raju's Traffic Study is there a strong recommendation for a Traffic Officer during dropoff/pick-up?
