

## Elizabeth Harsch

This will not work with so many cars heading down 2nd St in addition to the residents in the exact hours that you are considering drop off and pick ups. As it is we sometimes have to wait 2 signals and they are long. You will create a lot of back up on a one way street that is an emergency vehicle designated street. It is not practical unless the city changes the signal on PCH to give us considerably more time which would create more traffic at PCH .Limit parent drop off and pick up to PCH.
