Subject: Supplemental Item VI. PLAN HERMOSA: CARBON REDUCTION GOALS

Dear City Council:

We are really going, "Back to the Future?"

It is misleading and a disgrace not to include the full staff report from February 24, 2015:
<https://hermosabeach.legistar.com/LegislationDetail.aspx?ID=2214645&GUID=E24BDAA3-6F0F-403D-A781-C8801FD25F0A>

Please see attachment (7) Implementation Costs and Schedule-2020 target.pdf for the \$511,051 in carbon offsets.

This matter was settled in 2017, and you lost. You lost big time! You lost so much so, that you do not even use the term "carbon neutrality" anymore.
What happen to it?

This issue was discussed at the third City Council debate in 2017:
<https://www.youtube.com/watch?v=nhkQVKu3seg>

I recall the last attempt to save carbon neutrality was a confrontation with me during an EPAC Commission meeting with then-candidate Mary Campbell, the Boss and the Consigliere:
<https://www.youtube.com/watch?v=aEGkUAcEhtI>

It's time to let it go.

Very respectfully,

Matt McCool
