I agree with Ms Berman notwithstanding that Rob Saemann has exactly the right idea. This project has been going on actually for over 8 years, not just the 6 years.

Also to do it right in the future, the lot would best be dug out flat to the Eastern boundary and a retaining wall put in and then with two decks above the Palm Drive surface. The single property to the South, with its crazy long sliding door on the slope into the parking lot creates a massive headache for doing the leveling and decking.

This is no time to throw out the baby with the bathwater. Best leave this small project get done. Good G. at least something will get finished during the Lowenthal mess of cluster F after cluster F. Howard L. PS Thank you Rob Saemann for having the right idea.

Claudia Berman

Location: Hermosa Beach

After many years and obtaining a grant to proceed with parking lot D improvements, please give direction to complete the project as designed. I'm against changing the project direction that would more than double the cost and require "starting over" for an estimated 20 additional parking spaces. Please don't risk losing the funding. I also think a 2 story parking structure in that location would be an eye sore as well.
