#### SEWER FEE INCREASE 18-0323

The City Council on April 14, 2015 reduce the total amount of funds needed for the sewer replacement project from \$14 million dollars to \$11 million dollars by placing \$3 million dollars from the midyear budget (of 2015) which showed a surplus of funds. There has never been a final review of these funds. This is a separate fund for sewers only and all expenditures should be accounted for the propose of improving the sewer system only.
