New eComment for City Council Meeting (Closed Session - 6:00 P.M. and Regular Meeting - 7:00 P.M.)

Xavier Haase submitted a new eComment.

Meeting: City Council Meeting (Closed Session - 6:00 P.M. and Regular Meeting - 7:00 P.M.)

Item: 6a) REPORT 18-0616 CONSIDERATION OF ALTERNATIVE LOCATIONS FOR THE GREENBELT INFILTRATION PROJECT (Environmental Analyst Kristy Morris)

eComment: Dear Hermosa Beach City Council members: The people of this community have put thousands of hours and had countless meetings and have spoken to the Hermosa Beach City Council many, many times over the past seven months in an effort to convince the City Council members that the Stormwater Infiltration project has no place on the Greenbelt or in South Park. We have shown that these two sites are not viable not only from an engineering standpoint, but from a common sense standpoint. For example, the mathematics of the water table under the Greenbelt just don't add up for an infiltration project of any size. It simply is not viable there. The health and safety of our babies and our children is being placed directly at risk, and will be for generations. And the equity in the homes surrounding any project like this near homes will be severely affected — the equity that people have worked their entire lives to build — all of it vanishing overnight. Let all of us work together to find an equitable solution that involves ALL the responsible parties within the Watershed Management District. Hermosa Beach should not have to bear all the burden alone. Sincerely, Xavier Haase Board Member The Mooring HOA 501 Herondo Street Hermosa Beach
