New eComment for City Council Meeting (Closed Session - 6:00 P.M. and Regular Meeting - 7:00 P.M.)

RYAN DAVIS submitted a new eComment.

Meeting: City Council Meeting (Closed Session - 6:00 P.M. and Regular Meeting - 7:00 P.M.)

Item: 6a) REPORT 18-0616 CONSIDERATION OF ALTERNATIVE LOCATIONS FOR THE GREENBELT INFILTRATION PROJECT (Environmental Analyst Kristy Morris)

eComment: The Greenbelt is designated an O-S-1 zone by Municipal Code 17.32.040. Per 17.32.030, the list of permitted improvements to it is brief and specific: landscaping, beautification, erosion control and irrigation improvements or relating to anti-seawater intrusion wells as an existing use. A storm water infiltration facility is none of these. You, the members of the city council, have wasted years of planning and hundreds of thousands of dollars for a project on the Greenbelt that is not permitted by Municipal Code and is therefore outside the bounds of your authority. The Greenbelt's zoning requires a public vote before this project can be sited on it.
