I am writing HBCC to ask that you not make the proposed DEI/CRT curriculum mandatory in our schools.

Call it whatever you want but this is not about diversity, inclusion or tolerance. This is about the fact that we don't need school administrators and teachers to teach that to our children. We live it every single day.

Years back sex education was proposed in our schools but offered parents an option to opt out. That is what I am asking for now.

It is a PARENTS responsibility to instill morals and values in THEIR children.

We do not need YOU, HBCC, school administers or teachers to parent our children.

Furthermore, our children have been robbed of over a year of in person education and they are still trying to adjust. Our schools need to focus on teaching math, science & history ect

If HBCC takes the action of approving DEI, you are basically telling parents that the state of CA, schools boards and the politicians pushing this bigoted agenda know how to raise our children better than we do, let me assure you that is not the case.

Thank you for your time and consideration in advance!
